R30α Sensor
General Purpose, 300 kHz Resonant Frequency Acoustic Emission Sensor

Description and Features
The Alpha series family of sensors features SMA connectors versus the Microdot connectors found on PAC’s RXX series of passive sensors. The Alpha series includes R3α, R6α, R15α, R30α, R50α, R80α and WSα sensors. The major improvements in Alpha series over the RXX series include:
• Use of the more popular SMA type of connector.
• Cavity is machined from a solid stainless steel rod making for a simpler and more robust design.
• Dramatically increased thickness of the ceramic shoe for better mechanical stability.
• Distance from the bottom of the ceramic shoe to the bottom edge of sensor cavity increased for better insulation resistance and ground avoidance.
• Introduced a 30-degree angle at the bottom edge of the sensor cavity.

All these improvements make the Alpha series sensors more robust, reliable and greatly reduce the possible grounding of the cavity to the structure caused by wet environment.

Application
This sensor provides additional noise rejection for applications such as production line process monitoring applications such as punch press monitoring, forming operations, stamping, applications and process control applications such as leak detection within process control plants in the presence of flow and process noises.

Operating Specifications
Dynamic
Peak Sensitivity V/(m/s); [V/µbar] ….. 58 [-62] dB
Operating Frequency Range ……….. 100 - 400 kHz
Resonant Freq. V/(m/s); [V/µbar] … 300 [330] kHz
Directionality .................................. ±1.5 dB

Environmental
Temperature Range ....................... -65 to 175ºC
Shock Limit .................................. 500 g
Completely enclosed crystal for RFI/EMI immunity

Physical
Dimensions …….. 0.75” dia. x .88” h (19 x 22.4 mm)
Weight ..................................... 29 grams
Case Material ......................... Stainless Steel
Face Material ............................ Ceramic
Connector .............................. SMA
Connector Locations ...................... Side
Seal ........................................... Epoxy
Sensor to Preamp Cable (1 or 2 meters) ….. 1232-X-SMA

Ordering Information and Accessories
R30α ........................................ R30α or R30a
Magnetic Hold-Down .................... MHR15A
Preamplifier .............................. 0/2/4, 2/4/6
Preamp to System Cable (specify length in meters) ….. 1234 - X

Sensors include
NIST Calibration Certificate & Warranty

Frequency response of the R30a. Calibration based on ASTM E1106; Calibration based on ASTM E976.
