# Yellow Eyed Penguin Conservation Reserve

amazing photographic  
opportunities of the world's  
rarest penguin

hide viewing  
from  
4-5 metres

This reserve is a private conservation effort to save the world's most endangered penguin from extinction and is funded entirely through profits from this tour operation. We offer you the opportunity to visit a working conservation programme. To experience and photograph undisturbed activity at close range through a unique system of hides and tunnels. With your support we are able to replant breeding habitat, build nesting sites, trap predators, care for sick and neglected birds and carry out our own research programme. It is our hope that through this work, the future of this rare and wonderful bird will be assured.
